The reduced engine power warning message can come on your car or truck. Today's vehicles are for the most part completely electronically controlled. From every button and switch on the dash down to the 'fly-by-wire' throttle control system. Back in the day, before these electronically controlled throttles, everything was cable actuated.

### **Reduced Engine Power Warning- What's Wrong With My Truck?**

If your General Motors SUV or truck is losing coolant, with no visible signs of a leak, the source may shock you. Worse, allowing the problem to go on often results in a new engine. A cracked cylinder head is not the only potential cause, but it is a known problem on the General Motors V8 engines, in certain year models.
