Active Scripting (formerly known as ActiveX Scripting) is the technology used in Windows to implement component-based scripting support. It is based on OLE Automation (part of COM) and allows installation of additional scripting engines in the form of COM modules.

Active Scripting - Wikipedia

These gearbox conversion systems were designed as modifications of a popular SPG-2 system (was in production from 2000). They are intended for aviation conversion of 2 and 4-stroke engines and using them with propellers for NOT CERTIFIED experimental light aircraft, hovercraft, airboats etc. SPG-3 has the same gear pair as SPG-2 but lighter and easier to install-remove.

Twenty-five or so years ago, Alain Prost won his fourth world championship - and promptly retired. The car in which he achieved this final success, and which took Damon Hill to his first Grand Prix victories in the same year, was the technologically remarkable Williams-Renault FW15C. This was the ultimate electronic aids car before most of the technology was banned for 1994 and beyond.

Building The Reader. To simplify the process of linking the 3V Synapse module to the PC (i.e. avoid using a MAX232 and the extra PCB / wiring that would involve) I used a 3V FTDI USB to serial cable. The USB end plugs straight into the PC and provides a virtual serial port, the other end connects to the UART pins on the Synapse module.
