Generalized coordinates are usually selected to provide the minimum number of independent coordinates that define the configuration of a system, which simplifies the formulation of Lagrange's equations of motion. However, it can also occur that a useful set of generalized coordinates may be dependent, which means that they are related by one or more constraint equations.

1 Introduction. The repertory grid technique (RGT or RepGrid) is a method for eliciting personal constructs, i.e. what people think about a given topic. It is based on George Kelly's Personal Construct Theory in 1955 and was also initially developed within this context. Personal Construct Psychology (PCP) states that people's view of objects they interact with is made up of a collection of ...
