Earth's magnetic field, also known as the geomagnetic field, is the magnetic field that extends from the Earth's interior out into space, where it interacts with the solar wind, a stream of charged particles emanating from the Sun. The magnetic field is generated by electric currents due to the motion of convection currents of molten iron in the Earth's outer core: these convection currents are ...

Earth's magnetic field - Wikipedia

Continental margins Their rapid formation during Flood runoff. by Michael J. Oard. Although few scientists address this issue, the continental shelf and slope are very difficult to explain within the uniformitarian (slow and gradual) paradigm.
