To disable your TV's built-in speakers, connect the audio output from your TV to the TV Input on the CineMate system. In addition to the connection from the TV, you can also connect up to two audio/video devices directly to the CineMate system's auxiliary inputs (AUX) to assure the best-possible sound quality from these sources.

Connecting an audio/video device - Bose Corporation

Although there are benefits to both USB and aux connections, you will almost always get better sound quality out of a USB connection. While an auxiliary jack on your car radio will usually provide more utility, in that you can use it with a wider range of devices, the fact is that your head unit is almost certainly better at turning digital files into analog audio than your tiny smartphone or ...

What's the Difference Between USB and Aux?

connection. If network streaming is not possible or desired Zeppelin Wireless can also be set up in a non-networked mode allowing Bluetooth and AUX sources only. See section 3.1 for wireless network setup, wired network setup, and section 3.4 for non-network setup. After removing Zeppelin Wireless from the box, connect to a mains power supply.
