

Wed, 09 Jan 2019 07:07:00 GMT by darlene hertling management of pdf - Knee pain is pain in or around the knee.. The knee joint consists of an articulation between four bones: the femur, tibia, fibula and patella. There are four compartments to the knee. These are the medial and lateral tibiofemoral compartments, the patellofemoral compartment and the superior tibiofibular joint.

Thu, 10 Jan 2019 06:37:00 GMT Knee pain - Wikipedia (Bursitis) Bursitis is an inflammation of the bursae, which are small fluid-filled sacs that cushion the joints. The most common bursitis is patellofemoral bursitis, which is inflammation of the bursa between the patella and the femur. Other common bursitis include olecranon bursitis (at the elbow) and trochanteric bursitis (at the hip).

Knee Pain) Knee pain is pain in or around the knee. The knee joint consists of an articulation between four bones: the femur, tibia, fibula and patella. There are four compartments to the knee. These are the medial and lateral tibiofemoral compartments, the patellofemoral compartment and the superior tibiofibular joint.
