Tue, 15 Jan 2019 04:51:00 GMT www.mechanical-engineering-books-pdf.blogspot.com - In thermodynamics, an isentropic process is an idealized thermodynamic process that is both adiabatic and reversible. The work transfers of the system are frictionless, and there is no transfer of heat or matter. Such an idealized process is useful in engineering as a model of and basis of comparison for real processes. The word "isentropic" is occasionally, though not customarily, interpreted ... Sat, 12 Jan 2019 08:22:00 GMT Isentropic process - Wikipedia - Heat capacity or thermal capacity is a measurable physical quantity equal to the ratio of the heat added to (or

removed from) an object to the resulting temperature change. The unit of heat capacity is joule per kelvin, or kilogram metre squared per kelvin second squared in the International System of Units ().The dimensional form is  $L^2 M T^{-2} \hat{I}^{-1}$ . ...
