Cat intelligence is the capacity of the domesticated cat to solve problems and adapt to its environment. Researchers have also shown feline intelligence to include the ability to acquire new behavior that applies previously learned knowledge to new situations, communicating needs and desires within a social group, and responding to training cues.

The richness and complexity of social media data lends itself to a pragmatist research paradigm. This is not because of an inability to decide between the advantages and disadvantages of numerous alternatives; but rather this approach has sought to understand the variety of social media data by applying elements of more than one investigative approach.
