Control condition - definition of control condition by The ...

Control Condition (control group) During many experiments, researchers often include treatment groups (the groups that are given the treatment/IV) and a control group, which is identical to the treatment group in every single way except that the control group does not get the treatment/IV. In this way, the researcher can study effect (s)...

Control Condition (control group) definition | Psychology ...

controlled variables are those things that must be the SAME. = same dirt, same size pot, same plant , same amount of water, ONLY thing that changes (independent variable), is the amount of time spent in the sun - some a lot and some none.

Describe controlled conditions to find a ... - Yahoo Answers

In an controlled experiment you can test only one independent variable. That means that you can only change one condition in your experiment. If there's more than one independent variable in an experiment it becomes flawed. If you want to test another independent variable, you'll have to conduct another experiment.
