The v notch weir is widely used to measure open channel flow rate. It is especially good for measuring a low flow rate, because the area of flow through the v notch becomes quite small while the head over the v notch is still a measurable value. When a v notch weir is used to meter flow, the weir equation $Q = 2.49 H^{2.48}$ can be used to calculate Q, the flow rate over the weir (and through the ...
