we use chemical fertilizers at our farm for the first 4 months of the crops growing and chemical fertilizers aren't bad because we are other chemicals to even the soil out and we also have a great crop with this fertilizer with no till as well so organic is not the best fertilizer out there is i would suggest doing more research other than read to make a decision about fertilizers

Pros and Cons of Organic vs. Chemical Fertilizers | Today ...

In a chemical reaction, bonds between atoms are broken, the atoms rearrange, and then form new bonds.; But how are atoms bonded together in the first place? Atoms can bond in different ways. Bonds can be either ionic or covalent. In either type of bond, the electrons (negative charge) and protons (positive charge) from each atom are attracted to the oppositely charged protons and electrons in ...

Chemistry Review | Chemical Change | Inquiry in Action

An element is a chemical substance made up of a particular kind of atom and hence cannot be broken down or transformed by a chemical reaction into a different element, though it can be transmuted into another element through a nuclear reaction. This is so, because all of the atoms in a sample of an element have the same number of protons, though they may be different isotopes, with differing ...

Chemical energy, Energy stored in the bonds of chemical compounds. Chemical energy may be released during a chemical reaction, often in the form of heat; such reactions are called exothermic. Reactions that require an input of heat to proceed may store some of that energy as chemical energy in newly formed bonds. The chemical energy in food is converted by the body into mechanical energy and heat.

chemical energy | Definition & Facts | Britannica.com

Cosmetics are substances or products used to enhance or alter the appearance of the face or fragrance and texture of the body. Many cosmetics are designed for use of applying to the face, hair, and body. They are generally mixtures of chemical compounds; some being derived from natural sources (such as coconut oil), and some being synthetics or artificial.
