Prediabetes is the precursor stage before diabetes mellitus in which not all of the symptoms required to diagnose diabetes are present, but blood sugar is abnormally high. This stage is often referred to as the "grey area". It is not a disease; the American Diabetes Association says, "Prediabetes should not be viewed as a clinical entity in its own right but rather as an increased risk for ...

Prediabetes - Wikipedia

Alzheimer disease (AD) is a neurodegenerative disorder marked by cognitive and behavioral impairment that significantly interferes with social and occupational functioning. It is an incurable disease with a long preclinical period and progressive course. In AD, plaques develop in the hippocampus, a ...

Alzheimer Disease - Medscape Reference

Meningococcal disease describes infections caused by the bacterium *Neisseria meningitidis* (also termed meningococcus). It has a high mortality rate if untreated but is vaccine-preventable. While best known as a cause of meningitis, it can also result in sepsis, which is an even more damaging and dangerous condition. Meningitis and meningococemia are major causes of illness, death, and ...

Meningococcal disease - Wikipedia

Insulin resistance is a state in which a given concentration of insulin produces a less-than-expected biological effect. Insulin resistance has also been arbitrarily defined as the requirement of 200 or more units of insulin per day to attain glycemic control and to prevent ketosis.

Peptic ulcer disease (PUD) comprises both duodenal ulcer (DU) and gastric ulcer (GU). Duodenal ulcers occur most often in the first part of the duodenum or in the pre-pyloric region of the stomach (antrum). Gastric ulcers are most frequently seen on the lesser curve of the stomach at the junction of the body and antrum (angularis) (Figure 49.1). Acute stress ulcers involve the body of the ...
