Hydrology. Surface hydrology is the study of hydrologic processes that operate at or near Earth's surface. Drainage basin management covers water storage, in the form of reservoirs, and floods protection. Water quality includes the chemistry of water in rivers and lakes, both of pollutants and natural solutes.

Hydrology - Wikipedia

"Hydrology is the science that treats the waters of the earth, their occurrence, circulation and distribution, their chemical and physical properties, and their reaction with their environment, including their relation to living things. The domain of hydrology embraces the full life history of water on the earth".
