Chemical Reaction Engineering (CRE) principles can be applied in many areas, such as modeling smog in the L.A. basin, understanding the digestive system of a hippopotamus, or using wetlands to degrade toxic chemicals. This chapter develops the first building block of chemical reaction engineering, mole balances.

In physics and thermodynamics, an equation of state is a thermodynamic equation relating state variables which describe the state of matter under a given set of physical conditions, such as pressure, volume, temperature (PVT), or internal energy. Equations of state are useful in describing the properties of fluids, mixtures of fluids, solids, and the interior of stars.

A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the elements appropriately classified as such. Despite the lack of specificity, the term remains in use in the literature of chemistry. The six commonly recognised metalloids are boron ...
