QoS Service Models. The two QoS architectures used in IP networks when designing a QoS solution are the IntServ and DiffServ models. The QoS service models differ by two characteristics: how the models enable applications to send data, and the way in which networks attempt to deliver the

respective data with a specified level of service.

Game theory is the study of mathematical models of strategic interaction between rational decision-makers. It has applications in all fields of social science, as well as in logic and computer science. Originally, it addressed zero-sum games, in which one person's gains result in losses for the other participants. Today, game theory applies to a wide range of behavioral relations, and is now an ...
