Notes: (1) There is some discussion about the 454 being sold with 454 engines and aluminum heads. One very respected source says that according to records at Tonawanda no 454 with aluminum heads were assembled. Their records indicate the L89 option was cancelled (not replaced) with the demise of the L78/L89 combination.

I see where there are two wideband sensors on the 750 kit. If we go with a single turbo and run both exhaust sides through a log manifold on one side of the engine, will one of the wideband sensors be able to be shut off as there will be no way to run the second wideband (one for each side) with true data as both exhaust sides will run through one of the manifolds.
