Unlike Mendeleev, Mosely did not organize elements by increasing atomic masses. Instead, he organized the elements into a periodic table by atomic number. Recall that an element's atomic number is the number of protons in an atom of the element. The new way of organizing did not change the locations of most elements in the periodic table.

Mendeleev's Proposal Mendeleev's strategy for organizing the elements was modeled on the card game. Mendeleev made a "deck of cards" of the elements. On each card, he listed an element's name, mass, and properties. He paid special attention to how each element behaved in reactions with oxygen and hydrogen.

key was to break the elements into rows, as shown in Figure 3. Mendeleev arranged the elements into rows in order of increasing mass so that elements with similar properties were in the same column. The final arrangement was similar to a winning arrangement in solitaire, except that the columns were organized by properties instead of suits.
