The sources are listed in chronological order. Lists of metalloids differ since there is no rigorous definition of metalloid (or its occasional alias, 'semi-metal'). Sun, 20 Jan 2019 08:49:00 GMT Lists of metalloids - Wikipedia - In statistical mechanics, entropy is an extensive property of a thermodynamic system. It is closely related to the number Ω of microscopic configurations (known as microstates) that are consistent with the macroscopic quantities that characterize the system (such as its volume, pressure and temperature). Under the assumption that each

microstate is equally probable, the entropy is the natural ... Mon, 31 Dec 2018 01:27:00 GMT Entropy - Wikipedia - Chimie generale-QUARRIE_V_De Boeck 22/10/12 11:09 Page1. - Epstein - 1983 ... - La palabra "equipartición" significa "comparte por igual". El concepto original de la equipartición era que la energía cinética total de un sistema es compartida en partes iguales entre todas las partes independientes, en promedio, una vez que el sistema ha alcanzado el equilibrio térmico. La equipartición también hace predicciones cuantitativas de dichas energías.
