Abstract: Recent studies show that the state-of-the-art deep neural networks (DNNs) are vulnerable to adversarial examples, resulting from small-magnitude perturbations added to the input. Given that that emerging physical systems are using DNNs in safety-critical situations, adversarial examples could mislead these systems and cause dangerous situations. Therefore, understanding adversarial ...

Highlights We show how clothes systematically influence wearers' psychological processes. Three experiments demonstrate that wearing a lab coat increases attention. Attention did not increase when the coat was not worn or associated with a painter. Attention only increased when the coat was a) worn and b) associated with a doctor. The influence of clothes thus depends on wearing them and their ...

This paper forms part of the Physical Activity 2016 Series. Introduction. In a seminal 1953 Lancet paper, J N Morris and colleagues 1 reported an increased risk of coronary heart disease in London bus drivers compared with conductors. Since then, many observational studies have shown that lack of physical activity is a major risk factor for morbidity and premature mortality.2, 3, 4 Indeed ...

Play is essential to development because it contributes to the cognitive, physical, social, and emotional well-being of children and youth. Play also offers an ideal opportunity for parents to engage fully with their children. Despite the benefits derived from play for both children and parents, time for free play has been markedly reduced for some children.
