References - While Science Sleeps - Lange Zeit ging man davon aus, dass in der Natur nur ein Aminosäurenantiomer, nämlich die L-Form, vorherrscht. D-Aminosäuren wurden bis in 1960er Jahre hinein als "Laborartefakt" (systemabhängiger Fehler) betrachtet und als "unnatürliches Isomer" eingestuft. Auch heute noch findet man die Bezeichnung "unnatürliche Aminosäuren" für die D-Aminosäuren.
