Theoretical background. The acid dissociation constant for an acid is a direct consequence of the underlying thermodynamics of the dissociation reaction; the pK_a value is directly proportional to the standard Gibbs free energy change for the reaction. The value of the pK_a changes with temperature and can be understood qualitatively based on Le Châtelier's principle: when the reaction is ...

Any type of heat pipes can be used for low or cryogenic applications. Depending on the working fluids charged, cryogenic heat pipes can operate in a specific low temperature range, as shown in Table 1, which contains a list of the most commonly, used working fluids of heat pipes for cryogenic and low temperature applications, with some of their key thermal properties.

1. Introduction. More than 10 years of both extensive and intensive research activities have been devoted to developing lead-free piezoelectrics in response to the call for environmental protections , , , , . From the beginning, the goal was obviously to develop lead-free piezoceramics whose properties are no less than those of the market-dominating lead zirconate titanate (PZT).
