Designed and built by Alan Jackson, the Stepperhead is an attempt to combine, in one unit, the range of facilities found in a medium sized lathe and a small vertical/horizontal milling machine. In the 1950s David Urwick had designed and built the ingenious and versatile Metalmaster, a device that combined a lathe and milling machine without unduly compromising the attributes of either.

We had more than a few emails asking about the wobble felt on Touring motorcycles so we produced a class. Please take a moment to watch the Chat with Bob video, review the class offerings and read the hundreds of comments here in the Discussion section below. These are riders who have had the same issue and those who have found solutions for the problem.

Originally the MGB used a cylindrical 3-pin flasher unit (GFU103, Lucas FL5), but this is not the same as modern electronic 3-pin flashers. On the originals the third pin is used to flash the dash repeaters via additional contacts in the indicator switch, whereas on electronic units the third pin is connected to earth.

A crankshaft—related to crank—is a mechanical part able to perform a conversion between reciprocating motion and rotational motion. In a reciprocating engine, it translates reciprocating motion of the piston into rotational motion; whereas in a reciprocating compressor, it converts the rotational motion into reciprocating motion. In order to do the conversion between two motions, the ...

Recomissioning a stored Vincent: With rocker caps removed, also the big end quill and cylinder feed quill , and the long forward banjo bolt on the timing cover removed. And of course the main feed banjo bolt feeding the oil pump itself , ie at the bottom end of the large feed oil line, this loosened off before pouring oil into the tank above.

For UK cars the system remained like that until the end of production, but for North American cars the system changed in October 1969 with the 18GJ engine when the 'evaporative loss control system' was introduced (see North American Emissions Plumbing for more information on this system). The main additional component of this system is the large charcoal canister sitting in the right rear ...

A car (or automobile) is a wheeled motor vehicle used for transportation. Most definitions of car say they run primarily on roads, seat one to eight people, have four tires, and mainly transport people rather than goods.. Cars came into global use during the 20th century, and developed economies depend on them. The year 1886 is regarded as the birth year of the modern car when German inventor ...
